

NOTICE: 2nd HERBICIDE TREATMENT AT WEBSTER LAKE
Scheduled: May 7–9 (Weather Permitting)

Channels not previously treated in late April will be treated between May 7 and 9 with the most likely date being May 8. This treatment is a part of the annual Shoreline and Channel treatment. **Please refer to the map below for specific locations of the channels to be treated.**

Water Use Restrictions (in treated areas):

- **Fishing & Swimming:** No restriction
- **Drinking Water:** 2-day restriction
- **Pets/Livestock:** 1-day restriction
- **Turf & Ornamentals Irrigation:** 3-day restriction
- **Food Crops Irrigation:** 5-day restriction

If you use lake water for irrigation, **shut your system off before treatment and keep it off for 5 days.**

Funding & Costs

Due to a federal hold on the \$34,400 LARE Grant, WLCA must fund treatments through member dues and donations. Your generous contribution to the Weed Fund is most important.

This year's weed treatment program is expected to cost \$58,540.

Additional Notes

- Future treatment dates (for other invasive weeds and shoreline/channel areas) will be announced via email.
- Help eliminate "weed chop" by not boating through weed beds until after weeds have died down and by removing floating weeds from your shoreline, drying them, and disposing of them as trash.

Thank you for supporting Webster Lake through your dues and donations to the Weed and Fireworks Funds, which can be made online or by mail. See the website at www.lakewebster.net. (Click the Pay Dues Tab on the Home Page, then follow the instructions on the Pay Dues and Donations Page).
