

**NOTICE OF HERBICIDE TREATMENT #2 FOR WEBSTER LAKE ON MAY 20
AND
BEFORE AND AFTER PICTURES SHOWING THE RESULTS OF TREATMENT #1**

The map below shows the areas of Webster Lake which will receive treatment for Eurasian Water Milfoil (EWM) on May 20 & 21, weather permitting. These areas contain approximately 112 acres of EWM. The DNR has amended our permit to allow WLCA to treat all 112 acres rather than the 100 acres initially approved.

Areas 9, 10, 11, and 13, as shown on the map, will be treated with ProcettaCor.* It has been 3 years since these areas were treated with this herbicide. All other areas will be

treated with 2,4-D this year.

The following water usage restrictions apply in the designated areas:

- Irrigation in areas treated with 2,4-D: 21-day restriction.
- Irrigation in areas treated with ProcellaCor: 7-day restriction.
- Fishing and swimming: 0-day restriction.
- Drinking water: 2-day restriction.
- Domestic Animals/Pets/Livestock consumption: 2-day restriction.
- *If there is any difference between the restrictions listed here and those printed on the warning sign which will be posted in your yard, follow the restrictions posted on the warning sign.*

Exact dates for shoreline and channel treatments are yet to be determined but can be expected to occur no sooner than June 3 and no later than June 12. These treatments will be applied as soon as possible and in accord with our permit. Due to of the scope of the May 20-21 treatment, applying treatments to the shorelines and channels any earlier than the above projected dates could cause a depletion of oxygen levels in the lake resulting in a fish-kill. Additional Mail Chimp and Facebook notices of the treatment dates will be sent in advance of future treatments.

Please help prevent weed-chop by avoiding boating through these areas until the weeds have been treated and have become submerged below propeller depth. When weed-chop appears at your shoreline area, please consider removing it from the water and letting it dry, after which it can be bagged as trash and hauled away.

Thank you for your investment in in Webster through the payment of your dues and extra contributions to the Weed and Fireworks funds.
