

Shoreline and channel weed treatments on Webster Lake are scheduled for Wednesday, June 3, 2020, weather permitting, in all areas of the Lake other than those which received the LARE treatment for invasive species on May 27.

If your yard had an orange sign in it on May 27, you ARE in a LARE treatment area and your shoreline weeds are currently receiving the residual effects of the LARE treatment and will not be re-treated on June 3. Your shoreline weeds will receive a direct treatment about June 17. This is due to the required 21-day waiting period between LARE and shoreline treatments as stipulated by the DNR. The exact date of shoreline treatment in your area will be posted as soon as scheduled with the herbicide contractor.

This e-mail was sent out by WLCA using Mailchimp to the e-mail addresses which have previously been provided to WLCA. Please spread the word to your Webster Lake neighbors and friends about this e-mail. If they wish to receive future WLCA e-mails via Mailchimp, they need to send their e-mail address to websterlakeassociation@gmail.com and include their lake address and property owner's name or submit that information to WLCA through the Contact Section of the WLCA website at <http://www.lakewebster.net> -- a great place for more information about Webster Lake and the North Webster community. Thank you.
