

June 14, 2021 MailChimp Bulletin: Family Dixie Ride; 06/24/21 Weed Treatment – Irrigation; Safety Issues – Church Camp and Dixie Boat; Water Circulator purchases.

## Event

Saturday, June 19, is the WLCA Family Dixie Ride. The Dixie will leave the dock at 9:30 AM. In the event the Dixie is unable to operate on the 19<sup>th</sup>, the event will be held in the North Webster Town Park at the pavilion with playground and beach available for the kids. See details in our Summer Newsletter posted on the website at [www.lakewebster.net](http://www.lakewebster.net).

## Next Weed Treatment Date

The next shoreline and channel treatment is scheduled for June 24, weather permitting. This treatment will be primarily for shorelines and channels located in the 8 color-coded and numbered areas as shown on the map below. Shorelines and channels that were previously treated will be inspected and possibly retreated if current conditions justify retreatment.

## Irrigating with Lake Water

After the May 17<sup>th</sup> treatment, orange colored warning signs advising residents not to use lake water to irrigate lawns and flowers until June 24 were posted in lake front yards in map areas 3 through 8. See map below. The treatment on June 24 **will extend the “no-irrigation” warning for 5 more days**. Residents in treated areas should always check and heed the usage restrictions shown on the yard warning signs. With the enhanced connectivity provided WLCA through the use of MailChimp and Facebook, WLCA will make every effort to provide residents with early warnings as to such restrictions as we go forward.

## Water Circulators

Water Circulators are still available at last year's prices. Order blanks and pricing are available on the WLCA website at [www.lakewebster.net](http://www.lakewebster.net) . We were recently advised that Kasco, the manufacture of the circulators, is three to four weeks out on delivery for new orders. Order soon if you want a circulator for this season.

## Safety

- As of June 12, the Dixie Sternwheeler is back in operation. Please yield the right of way to the Dixie. She is a big boat and simply cannot turn or stop quickly. Above all, please do not cut across her bow when pulling your skiers, wakeboarders, or tubers.
- Epworth Forest Church Camp located on the north shore of Webster Lake is in session in June and July. The Camp also owns the big island and uses it for camp activities. When boating in this area, please be alert for campers paddling kayaks and canoes from the north shore to the big island and back. Row boats and sail boats have the right of way. Please yield to them. Also watch for campers swimming or playing on the inflatables in that area. Due to COVID-19 protocols established for the protection of the campers, the Camp administrators have stated that the general public should NOT use the beach at the island when the campers are using this privately owned beach area.
- Safety buoys have been placed throughout Webster Lake. The buoys may indicate No Wake areas where boats should travel at idle speed or shallow areas where underwater hazards exist. Please know and understand that it is not possible to mark every underwater obstacle. Driver caution is required and advised. The 2021 WLCA Summer Newsletter includes a map of the lake indicating additional areas containing greater underwater hazards. The newsletter with map is posted on our website at [www.lakewebster.net](http://www.lakewebster.net) .
