

P.O. Box 79, North Webster, IN 46555 www.lakewebster.net

Dear WLCA Member and Webster Lake Property Owner:

Weed Chop, Duckweed, and stagnant water are an unfortunate part of lake-front living on Indiana lakes, and Webster Lake is no exception.

At our members' request, The Webster Lake Conservation Association has been doing some research into mechanical means to help keep shorelines clear of weed chop and duckweed. We have learned that the best weapon against this problem is to keep the water moving.

Our new herbicide applicator, Clarke Aquatic Services, has been working with one of their suppliers as a provider of this type of water circulating equipment to establish a group pricing package for Webster Lake property owners.

The device is an electric powered surface water circulator that can be affixed to a pier or other structure. A properly installed electrical connection of either 120 or 240 Volt current with ground and breaker installed in proximity to your pier or seawall is required for its operation. When activated, the circulator sets up a current in the water that helps push weed chop and duckweed away from your shoreline where wind and water action can further help dissipate it.

WLCA and Clarke Aquatic Services will set up two locations on Webster Lake where you may see a demonstration of this product on June 16 beginning at noon following the annual WLCA Member Dixie Cruise and Pot Luck Brunch. The Dixie will leave the Town Park promptly at 9:30 AM.

These locations are:

- 1) 45 EMS W14B LN, North Webster. Owners are Jacob and Stephanie Yahne
- 2) 401 N. 2ND Street, North Webster. Owners are Mike and Wanda Wyrick

Clarke Aquatic Services is offering a package price to Webster Lake property owners for the purchase and installation of this equipment. Clarke also has alternate pricing for those who would prefer to do the installation themselves. WLCA and Clarke are extending these offers to interested Association members and non-members alike.

Please see the reverse of this page for additional information and pricing from Clarke Aquatic Services.

If you are not already a member of WLCA, please consider joining the Association. Association efforts are focused on keeping the lake clean and safe for fishing, swimming and boating and encouraging the property owners and members to work together for the improvement of the lake in order to make the region healthful, restful and attractive for the benefit of all.

WLCA is classified as a 501(c)(3) organization. Your donations are tax deductible to the extent allowed by law.

Help eliminate stagnant water and weed chop from your dock with a brand new surface water circulator from Clarke Aquatic Services. Various pricing options are available to fit every need. Choose either a ¾ HP option or a 1 HP option with 50 ft. of cord or 100ft of power cord. Power options of 120v or 240v are also available. Each unit comes with a 3 year warranty. Clarke is a certified distributor and installer to help make the installation easier and ensure the proper placement of each unit. Installation from Clarke includes lifetime support of your unit, delivery, installation and all installation materials necessary.

Descriptio n	Voltag e	Webster Price Direct Ship to resident	Webster Price Installed by Clarke
