

NOTICE: HERBICIDE TREATMENT AT WEBSTER LAKE

Scheduled: April 27–28 (Weather Permitting)

Treatment for Curly Leaf Pondweed (CLP) will occur in designated areas of Webster Lake (approx. 40 acres). Please refer to the map below for specific locations. CLP exists in other areas of the lake, most of which will be treated later.

Water Use Restrictions (in treated areas):

- **Fishing & Swimming:** No restriction
- **Drinking Water:** 2-day restriction
- **Pets/Livestock:** 1-day restriction
- **Turf & Ornamentals Irrigation:** 3-day restriction
- **Food Crops Irrigation:** 5-day restriction

If you use lake water for irrigation, **shut your system off before treatment and keep it off for 5 days.**

Funding & Costs

WLCA will fund this treatment with member dues and donations. Our LARE Grant does not include treatments for Curly Leaf Pondweed. Your generous contribution to the Weed Fund is most important.

Additional Notes

- Future treatment dates (for other invasive weeds and shoreline/channel areas) will be announced via email.
- Help eliminate “weed chop” by not boating through weed beds until after weeds have died down and by removing floating weeds from your shoreline, drying them, and disposing of them as trash.

Thank you for supporting Webster Lake through your dues and donations to the Weed and Fireworks Funds, which can be made online at www.lakewebster.net.
